## Module Description

The Keyboard PBC provides the feedbacks for the keyboard connector, which are required for the Commodore VIC-20 Diagnostic software. The LED works as an alternative Power LED.

## RESTORE Cable (J2)

This is a solder pad for the RESTORE Cable (Doc.-No. 159-3-04-\*\*) from the cable set. The cable is soldered to the pad and a knot serves as a strain relief.

This cable is connected to a single pin of the User Port PCB.
